

Announcing:

GD&T Training Seminar

October 22 – 23, 2009

Hilton Garden Inn - Fort Washington, PA

Holco is partnering with **Optical Gaging Products** and the **International Institute of GD&T** to present a seminar series that explores the implications of GD&T as it applies to all manufacturing and design disciplines.

Precision GD&T: Introduction & Fundamental Principles

This fundamental course is for those who must read and interpret engineering drawings and who want to develop or improve their understanding of the basics of measurement tools, geometric symbology, and engineering drawing interpretation as applied per ASME Y14.5M1994.

Course Topics:

- Introduction to Theory and Rules
- Datums and Datum Features
- 14 Geometric Symbols
- Feature Control Frames
- Beginning Analysis of Measurement Applications
- Global Simplification of GD&T

Dr. Greg Hetland, President of the International Institute of GD&T, and a recognized leader in GD&T and uncertainty measurement, will be leading the seminar.
