Machine Tools and Measuring Systems

Holco was founded **over 45 years** ago with the expressed intent of providing industry with production and inspection equipment of the **highest performance** and precision. Since our incorporation in **1960** we have represented some of the "who's who" in the world of **specialty machining** and measuring. We have maintained these relationships over many years, providing a level of continuity to our customer base that is **rare** in this industry, representing one company for our entire history and most companies for an average of **25 years!**

For us, **support is everything** and we strive to choose our builders wisely, paying special attention to their **commitment** to service and technical support. Make no mistake - providing the **best support** does not happen by accident! It is a pledge made by a builder, backed by money and people, in the **service of the customer.**

If you are located in Eastern Pennsylvania, Southern New Jersey, Delaware, Maryland or D.C. we look forward to working with you, and in the process, helping your company achieve its goals in the new millennium. Partnership is a goal we all need to embrace if manufacturing, the core of our economy, is to remain a force in our country.
